Customizing Your Lexus

Depending on specifications, the vehicle shown in the illustration may differ from your vehicle in terms of color and equipment.

Overview

Instrument Panel

* : If equipped

Topic 1

Entering and Exiting

Keys	7
Theft Deterrent System	8

Keys

■ Keys

- 1 Master keys
- 2 Valet key
- 3 Key number plate
- 4 Flat key

■ Wireless remote control

- 1 **LOCK button** : Locks doors
PANIC button : Sounds alarm
(Push and hold)
(Use this function if you notice anyone suspicious near the vehicle)
- 2 **UNLOCK button** : Unlocks doors
- 3 **Trunk button** : Unlocks trunk
(Push and hold)

Holding down the LOCK button will sound an alarm.
Holding down the UNLOCK button will open the side windows.

Theft Deterrent System

This system is designed to help protect your vehicle from theft.

■ Engine immobilizer

This system only allows the engine to start if a registered key is used.

This deters theft caused by the use of unauthorized keys.

■ Alarm

Forcibly unlocking the doors, trunk, or hood without the key or wireless remote control causes the horn to blow and the exterior lights to flash, alerting those in the surrounding area.

■ Steering lock

The steering wheel is locked when the engine switch is turned off.

If the security indicator light is flashing when you leave the vehicle, the engine immobilizer and alarm are set.

To stop the alarm, unlock the doors or trunk with the key or wireless remote control, or turn the engine switch to the ON position.

Before Driving

Seats	11
Seat Position Memory System	12
Front Head Restraints	13
Seat Belts	13
Outside Rear View Mirrors	14
Anti-glare Inside Rear View Mirror	15
Steering Column	15

Seats

■ Adjusting seat position

- 1 Moves seat forward
- 2 Moves seat back

■ Adjusting seatback angle

- 1 Incline
- 2 Recline

■ Adjusting the seat cushion

- 1 Raises and lowers the front of the cushion
- 2 Raises and lowers the entire cushion

■ Adjusting firmness

The lumbar support can be adjusted.

- 1 Firmer
- 2 Softer

Inclining front seat

- 1 Incline

Seat Position Memory System

With the push of a button, you can adjust the seat to a set customized position. The steering column and outside rear view mirrors are adjusted along with the driver's seat. Positions can be conveniently recorded for drivers and frequent passengers.

Setting positions

- 1 Push the "SET" button.
- 2 Within 3 seconds after the "SET" button is pushed, push button "1" or "2" until the signal beeps. This operation is also available while pushing and holding the "SET" button.

Recalling positions

Push one of the memory buttons (1 or 2).

Entering and Exiting

Opening and Closing

What to do if ...

Customizing Your Lexus

Front Head Restraints

Height adjustment

- 1 To raise: pull upward
- 2 To lower: depress the button and push down

Angle adjustment

Move forward and backward.

Seat Belts

Seat belt guides

To use the seat belt guide, detach the hook, let the seat belt run under the guide and then reattach the hook.

■ Rear seat belt holders

Hold the rear seat belt with the holder when not in use.

Outside Rear View Mirrors

■ Adjustment

- 1 Use the master switch to select which mirror to adjust (L or R).
- 2 Adjust the angle using the control switch.

Auto tilt:

Move the master switch to "L" or "R", Mirrors automatically tilt down when shifting into reverse. To deactivate, move the master switch to middle position.

■ Folding rear view mirror

- 1 Push inward

Opening and Closing
What to do if ...
Customizing Your Lexus

Anti-glare Inside Rear View Mirror

The auto-dimming function reduces glare from the headlights of vehicles behind you.

■ Setting AUTO mode

Push the AUTO button.

The indicator light comes on when AUTO mode is selected.

Steering Column

■ Raising and lowering

- 1 Up
- 2 Down

■ Adjusting forward/back

- 1 Away from the driver
- 2 Toward the driver

When the key is removed, the steering column moves to provide easy exit and entry. When the key is inserted, the steering column returns to its previously set position.

Topic 3

When Driving

Starting	17
Automatic Transmission.....	18
Parking Brake.....	19
Turn Signal Lever.....	19
Emergency Flasher Switch	20
ECT Switch.....	20
TRAC/VSC Off Mode	20
Cruise Control	21
Trip Information Display.....	22

Starting

Starting the engine

Make sure the parking brake is engaged and the shift lever is in "P".

- 1 Depress the brake pedal.

- 2 Turn the engine switch to START.
The engine will start.

Stopping the engine

- 1 Depress the brake pedal and move the shift lever to "P".
- 2 Turn the engine switch to OFF.

Engine (ignition) switch

- 1 LOCK
- 2 ACC
The audio system and other accessories can be used.
- 3 ON
- 4 START

Automatic Transmission

Shift range positions

- P Parking and engine starting
- R Reverse position
- N Neutral position
- D Normal driving position
- S Sequential mode driving

Switching out of "P" position can only be performed while the brake pedal is depressed.

Sequential mode

Sequential mode allows the driver to select gears based on driving conditions.

Move the shift lever to the "S" position.

Upshifting : move the lever to the "+" side

Downshifting : move the lever to the "-" side
1st through 6th gear can be selected.

The selected shift range is displayed on the instrument cluster.

NOTE: Downshifting increases power going uphill, or increases engine braking going downhill or stopping.
During normal driving conditions, always drive in "D" position for best fuel economy.

Customizing Your Lexus

Parking Brake

■ Setting the parking brake

Firmly depress the parking brake pedal.

■ Releasing the parking brake

Pull the lever.

Turn Signal Lever

- 1 Left turn
- 2 Right turn

Lane changes can be signaled by moving and holding the lever partway.

Emergency Flasher Switch

All the turn signal lights will flash.

The emergency flashers will work even when the engine is off.

ECT Switch

Use to select a mode suitable to driving and road conditions.

- 1 **"Power" mode**
For more powerful acceleration and sporty driving
- 2 **"Normal" mode**
For ordinary driving
- 3 **"Snow" mode**
For slippery road surfaces and slower acceleration

The indicator light comes on when in "Power" or "Snow" mode.

TRAC/VSC Off Mode

This switch turns off the traction control system or the vehicle stability control system. Use this switch if the wheels get stuck in snow, mud, etc.

To turn off TRAC: Push the VSC OFF switch briefly. The slip indicator light will come on.

To turn off VSC: Push and hold the VSC OFF switch for 3 seconds when the vehicle is not moving. The slip indicator light and VSC OFF indicator light will come on.

Press the switch again to turn the system back on.

Customizing Your Lexus

Cruise Control

The cruise control allows the vehicle to be driven at a fixed speed without using the accelerator pedal.

Use for highway driving or when traveling at the same speed for long periods of time.

- 1 Indicator
- 2 Cruise control switch

Setting the speed

- 1 Press the "ON-OFF" button
The system will turn on.
- 2 Push the lever down while traveling at the desired speed
This sets the vehicle at that speed.

Canceling

Pull the lever to temporarily cancel the preset speed.

Press the "ON-OFF" button to turn the system off.

■ Resetting the speed

Using the lever.

To increase speed: raise the lever

To decrease speed: lower the lever

Release the lever when the desired speed is reached.

Using the acceleration/brake pedal.

Push the lever down after accelerating/decelerating to the desired speed.

Depressing the brake pedal cancels the preset speed. To return to the preset speed, raise the lever.

■ Trip Information Display

The following information concerning your vehicle is displayed.

■ Display information

Trip information

- Available driving distance
- Average fuel consumption
- Average vehicle speed

Customizing Your Lexus

■ "AUTO" mode

- 1 Push the "AUTO" button
- 2 Push the air intake controls a few times until the "AUTO" indicator turns on.
- 3 Adjust the temperature with the "TEMP" button.

■ "DUAL" mode

In "DUAL" mode, driver and passenger side temperature settings can be controlled separately.

- 1 Push the "DUAL" button.
- 2 Adjust the driver side temperature with the "TEMP" button, and the passenger side temperature with the "PASSENGER TEMP" button.

When the outside temperature is low, the windshield may fog up more easily. In this case, push the air intake controls to select the outside air mode.

Seat Heater Switches

- 1 ON
Turn the dials to the left.
- 2 OFF
Turn the dials to the right until they stop.

Console Box

Upper box

Press the button to release the lock.
Lift armrest to open.

Lower box

Pull up on lower tab.
Lift to open.

- 1 Unlock the lower box
- 2 Lock the lower box

There is an accessory 12 V / 10 A power outlet located inside the console box.

Driving Comfort

Opening and Closing

What to do if ...

Customizing Your Lexus

Coin Box

Slide the switch backward.

Cup Holder

Push the cup holder lid to open.

- 1 Push in the cup holder
- 2 Close the lid

Cigarette Lighter and Ashtray

Push the lid to open.

Push the cigarette lighter down.

To remove the ashtray, pull it out.

Glove Box

- 1 Open
- 2 Lock
- 3 Unlock

To lock, insert the master key and turn it clockwise.

Auxiliary Box

Push the tab to open.

Garage Door Opener

The garage door opener can be programmed to operate garage doors, gates, entry doors, door locks, home lighting systems, security systems, and other devices.

The garage door opener (HomeLink® Universal Transceiver) is manufactured under license from HomeLink®.

The HomeLink® compatible transceiver in your vehicle has 3 buttons which can be programmed to operate 3 different devices.

■ Programming HomeLink®

- 1 Hold your hand-held transmitter within 3 inches of the HomeLink® buttons.
- 2 Press and hold down the desired HomeLink® button.
- 3 For U.S.A. owners:
While pressing the HomeLink® button, press and hold down the button on the hand-held transmitter until the indicator light changes from a slow to a rapid flash.

For Canadian owners:

While pressing the HomeLink® button, repeatedly press and release (cycle) the button on the hand-held transmitter every 2 seconds until the indicator light changes from a slow to a rapid flash.

If your garage door is of the rolling code type:

- 4 Press the learn button on the motor-head unit in your garage.
- 5 Press and hold the vehicle's programmed HomeLink® button for 2 seconds and release it. Repeat this step once again. The garage door may open.

If the door does not open, press and release the same button once again.

■ Programming other devices

For U.S.A. owners:

- To program an entry gate, see the Owner's Manual.
- To program other devices, contact your Lexus dealer.

For Canadian owners:

- To program all devices, follow the same procedure as for garage door programming.

■ Operating HomeLink®

Press the appropriate HomeLink® button. The indicator light should come on.

Topic 6

Opening and Closing

Doors.....	41
Power Windows.....	42
